About

Integrated MS/PhD student in Mechanical and Robotics Engineering at GIST, advised by Prof. Pyojin Kim. Research interests include Computer Vision, Robot Vision, and SLAM, with a focus on LiDAR/visual-inertial odometry, 3D scene reconstruction, and robust state estimation.

Work

2026-03-01 –

Graduate Research Assistant

Conducting research on Computer Vision, Robot Vision, and SLAM under the supervision of Prof. Pyojin Kim.

Highlights

- LiDAR/Visual-Inertial Odometry
- 3D Scene Reconstruction
- Robust State Estimation

Education

Gwangju Institute of Science and Technology (GIST) 2026-03-01 –

🎓 Mechanical and Robotics Engineering

Integrated MS/PhD

Courses

- Computer Vision
- Robot Vision
- SLAM

Gwangju Institute of Science and Technology (GIST) 2022-03-01 – 2026-02-28

🎓 Electrical Engineering and Computer Science

Skills

Programming

- Python
- C++

Frameworks & Tools

- ROS / ROS2
- PyTorch

Research Areas

- Computer Vision
- Robot Vision
- Simultaneous Localization and Mapping (SLAM)
- LiDAR / Visual-Inertial Odometry
- 3D Scene Reconstruction

Languages

Korean

Native speaker

English

Professional working proficiency

Interests

Computer Vision & Robot Vision

- Visual perception for autonomous systems
- Depth estimation and 3D reconstruction

SLAM & State Estimation

- LiDAR-Visual odometry
- Loop closure and global localization
- Robust estimation under challenging conditions
